

HOLIDAY ENGAGEMENT: MIDDLE SECTION 2023-24

Class VI

**Express yourself!
Explore knowledge!**

FROM THE PRINCIPAL'S DESK....

If Life were predictable, it would cease to be life, and be without flavor.

Dear Students,

These Summer months of May and June help us to take stock of ourselves as we rest, replenish our minds and get revitalized for the busy months ahead. The holidays ensure perfect family time and opportunities for travel and pursuing interests and hobbies.

They say that an umbrella, a book and the mind only work when open !!! So let us open our minds and embrace the various ways in which we can enhance our thoughts, empower our learning and expand our knowledge during the summer break.

The Summer Holiday Engagement of 2023, comes with a special intent and purpose.

Each challenging and interesting project will take you on a journey....a journey of self discovery and introspection.

Every task will have a significant FUN quotient as well as an inherent reward of knowledge attained.

Almost all options will require a bit of family involvement because we want our Goenkan minds to communicate and collaborate with friends, parents and siblings. In our educational experience, we should always keep pace with our surroundings for which social interactions are the key.

In my opinion, all efforts are appreciated and I value the importance of creativity and individual strengths of all students.

Hope everyone enjoys the roller coaster ride and the overall impact of learning from this Goenkan initiative of the Summer Holiday Engagement 2023-24.

Let us reinvent ourselves through mutual sharing, working together and internalizing progressive ideas.

ELEVATE ! EXPLORE ! EXPRESS ! ENJOY THE CHANGE !

Learning can become a joyful experience if we introduce some fun techniques and do away with the boring study patterns.

This summer, the Holiday assignment will help you to learn, enjoy and enhance your talents.

In mathematics, especially in geometry and its applications, an object is said to have symmetry if it can be divided into two identical halves. Symmetry exists when something that has matching parts faces each other or around an axis. Symmetry is a fundamental part of geometry, nature, and shapes. It creates patterns that help us organize our world conceptually. We see symmetry every day but often don't realize it. Symmetry creates balance, harmony, and order in design, which has a similar impact on the mind. So, children let's put on your thinking caps & do the following:
